

## SOLITAIRE CHESS

*Solitaire Chess* es un juego de lógica e ingenio inventado por el finlandés Vesa Tiimonen, producido por *Thinkfun* desde 2010 y distribuido en España por [Mercurio](#).

El juego es para un solo jugador y está basado en las reglas del ajedrez. El objetivo es capturar las piezas del tablero, de acuerdo con las cartas de desafío y siguiendo las reglas de movimiento, hasta que sólo quede una pieza en el tablero.

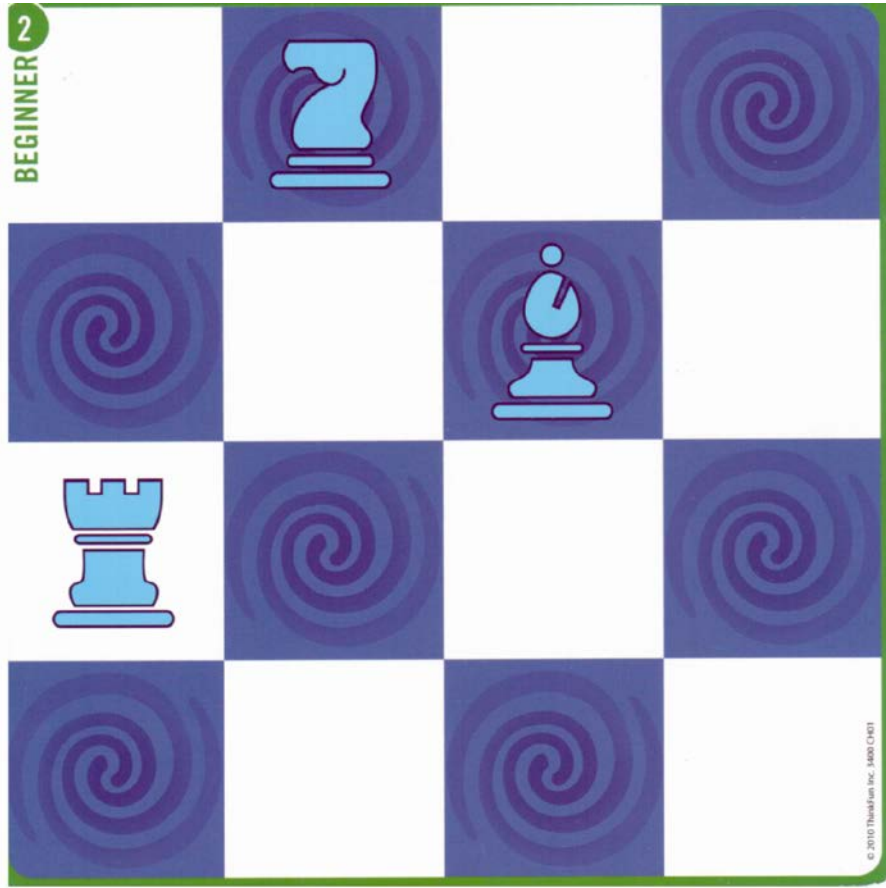

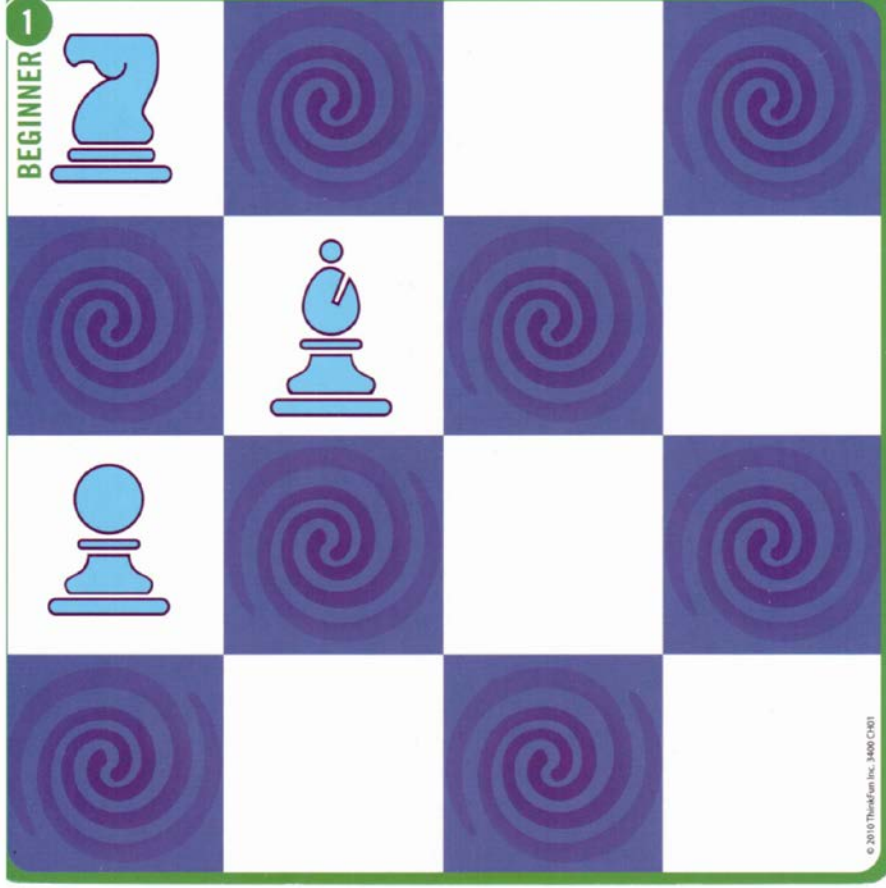

Hay algunas diferencias clave con el ajedrez tradicional, pero los movimientos de las piezas son los mismos:

- *Solitaire Chess* es una versión simplificada con un cuarto del tamaño de un tablero de ajedrez normal.
- Dado que el juego es para un solo jugador, todas las piezas son del mismo color.
- Cada vez que se realiza un movimiento debe capturarse una pieza.
- Si el desafío incluye al Rey, esta pieza será la última que quede en el tablero ya que el Rey nunca se captura.

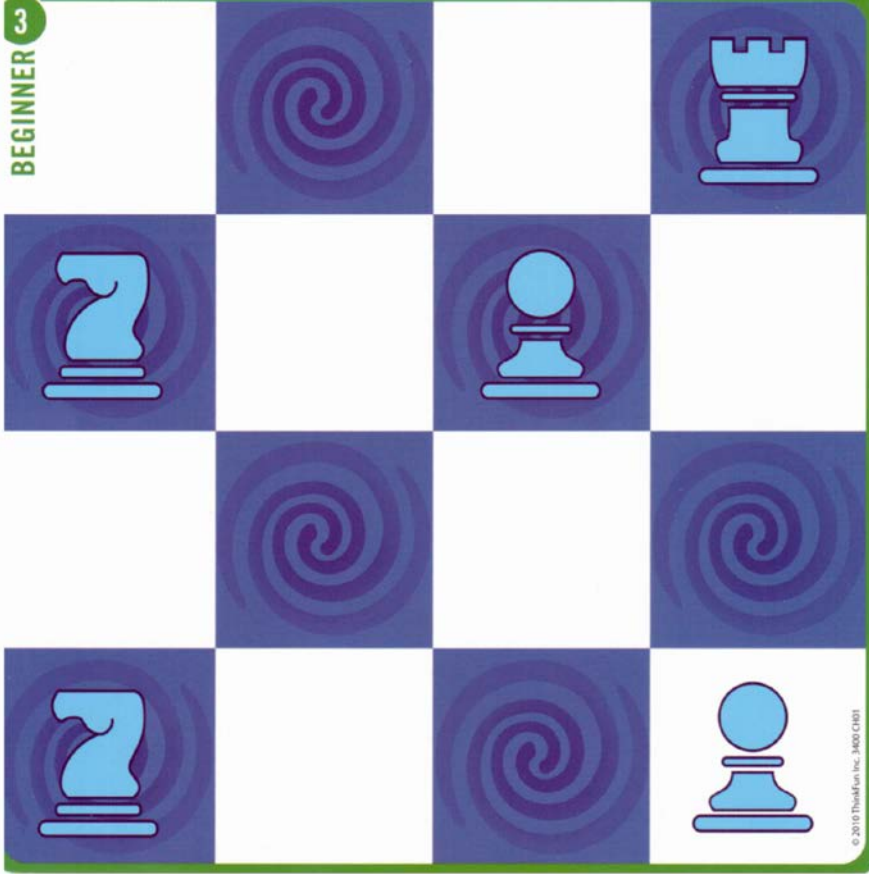

El juego incluye 60 retos divididos en 4 niveles de dificultad (principiante, intermedio, avanzado y experto), 10 piezas de ajedrez (1 Rey, 1 Dama, 2 Torres, 2 Caballos, 2 Alfiles y 2 Peones), un tablero con bandeja para las piezas y un manual de instrucciones con reglas, pistas y soluciones.

Para configurar un juego se debe empezar por elegir un reto con el nivel deseado de dificultad y colocar las piezas correspondientes en el tablero. Sabrás que has resuelto el desafío cuando te quede una única pieza en el tablero. Si te quedas con más de una pieza, y no hay más movimientos posibles, es necesario reiniciar el desafío y volver a intentarlo.
